Integrated validation framework for longitudinal salivary biomarker prioritisation

Longitudinal protein responses were integrated with robustness, cross-cohort, regulatory, and pathway-level evidence.

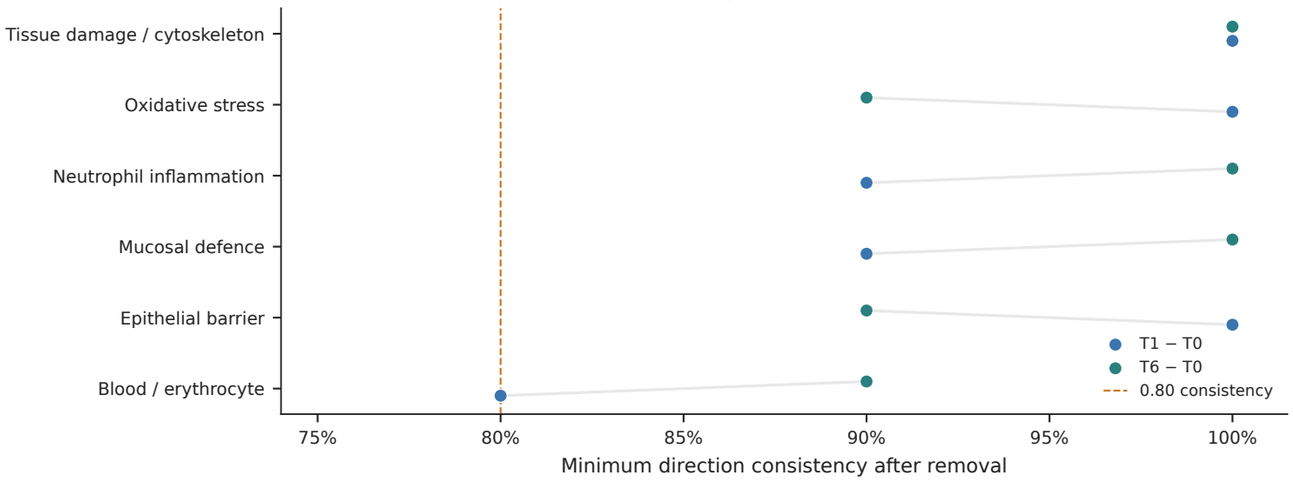

A Longitudinal protein-response trajectories

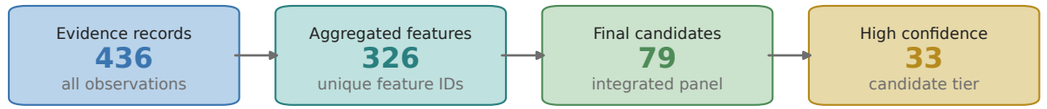

B Biological module responses

C Leave-one-protein-out sensitivity

D Integrated candidate evidence

Candidate representation by dataset

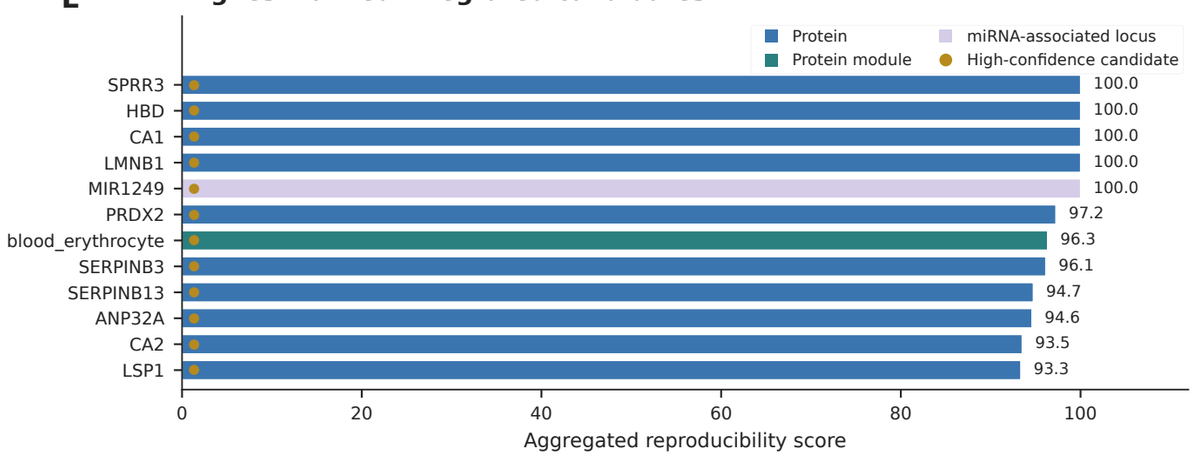

PXD043901: 53
GSE312585: 25
GSE121910: 1

Candidate representation by feature type

Protein: 51
miRNA-associated locus: 24
Protein module: 2
Mature miRNA: 1
Probable miRNA host gene: 1

Median reproducibility score 85.1 • Maximum 100.0

E Highest-ranked integrated candidates

F Biological interpretation

Principal enriched biological process

1 **Antimicrobial peptides**

Biological evidence summary

Minimum adjusted P value	**0.0022**
Candidate-protein overlap	**14%**
Matched candidate proteins	**7**
Significant pathways	**18**
