candidate_panel: KEGG
Background: measurable PXD043901 human proteome; n = 473
Nitrogen metabolism
Gastric acid secretion
Pyrimidine metabolism
Calcium signaling pathway
Phosphatidylinositol signaling system
Collecting duct acid secretion
Amphetamine addiction
Arrhythmogenic right ventricular cardiomyopathy
Salivary secretion
Cytoskeleton in muscle cells
MAPK signaling pathway
cGMP-PKG signaling pathway
Vascular smooth muscle contraction
C-type lectin receptor signaling pathway
VEGF signaling pathway
Olfactory transduction
Phototransduction
Aldosterone synthesis and secretion
Glioma
Cornified envelope formation
