mir143_linked: GO_BP
Background: measurable PXD043901 human proteome; n = 473
syncytium formation by plasma membrane fusion
plasma membrane repair
regulation of T cell mediated cytotoxicity
positive regulation of T cell mediated cytotoxicity
morphogenesis of an epithelial sheet
T cell cytokine production
MHC protein complex assembly
MHC class I protein complex assembly
antigen processing and presentation of peptide antigen via MHC class I
peptide antigen assembly with MHC protein complex
peptide antigen assembly with MHC class I protein complex
positive regulation of cytokine production involved in immune response
regulation of T cell cytokine production
syncytium formation
nuclear migration
adenylate cyclase-modulating G protein-coupled receptor signaling pathway
myoblast fusion
response to iron ion
calcium-ion regulated exocytosis
heterochromatin formation
