mir143_linked: KEGG
Background: measurable PXD043901 human proteome; n = 473
Cytoskeleton in muscle cells
Apoptosis
IgSF CAM signaling
Herpes simplex virus 1 infection
Epstein-Barr virus infection
Human T-cell leukemia virus 1 infection
MAPK signaling pathway
Vascular smooth muscle contraction
Motor proteins
Focal adhesion
Human cytomegalovirus infection
Human immunodeficiency virus 1 infection
Antigen processing and presentation
Proteoglycans in cancer
Integrin signaling
Tight junction
Pathogenic Escherichia coli infection
Salmonella infection
Regulation of actin cytoskeleton
