nonlinked_candidate: KEGG
Background: measurable PXD043901 human proteome; n = 473
Nitrogen metabolism
Salivary secretion
Cornified envelope formation
Gastric acid secretion
Pyrimidine metabolism
Calcium signaling pathway
Phosphatidylinositol signaling system
Collecting duct acid secretion
Amphetamine addiction
Arrhythmogenic right ventricular cardiomyopathy
cGMP-PKG signaling pathway
C-type lectin receptor signaling pathway
VEGF signaling pathway
Olfactory transduction
Phototransduction
Aldosterone synthesis and secretion
Glioma
Amoebiasis
mTOR signaling pathway
Renin-angiotensin system
